- Design and develop web applications using ReactJs.
- Implemented RESTful APIs and integrated them with front-end components to enable seamless data flow. Designed and built responsive UI.
- Effectively implemented software changes and alterations according to design specifications.
- Implemented and updated application modules.
- Testing web applications.
- Utilized Git for version control and collaborated with team members using collaborative workflows.

PROJECTS

1. Product Catalog

Product Catalog is a Banking/Finance project. This project provides personalized recommendations to users based on their transaction histories encompassing available loans, credit card offers, limits, and tax reductions. Designed with different modules to meet specific requirements, the system ensures that users access only the functionalities and data relevant to their roles, enhancing both security and user experience.

Technologies involved: HTML5, CSS3, JavaScript, MaterialUI, Reactjs.

2. Furniture Land

Furniture Land is e-commerce project aimed at offering a comprehensive online platform for all types of furniture. This project seeks to create a user-friendly and visually appealing website or application where customers can explore, purchase, and personalize a wide range of furniture items for their homes and businesses.

Technologies involved: HTML5, CSS3, React Bootstrap, JavaScript, Redux, ReactJs.

3. Todos Application (prasannatodo12.ccbp.tech)

A robust task tracking system with CRUD capabilities, crafted to simplify task management. Designed with HTML, CSS and Bootstrap to ensure a user-friendly interface for managing tasks. Dynamic UI updates through JavaScript event listeners and DOM operations for seamless CRUD operations. Secure task persistence through local storage methods, ensuring that tasks are never lost.

Technologies involved: HTML, CSS, JS, Bootstrap.
